

# Finding Information In the Maze

Tuesday		February 15 2011	
08:00 - 09:15	Sametime 8.5.1 : Do's, Don't and other Considerations (Jonathan Distad of Perficient)		Admin
08:30 - 09:45	Learning to Run: XPages for Lotus Notes Client Developers (Kathy Brown of RunningNotes)		Dev
09:45 - 11:00	VMWare 201: Getting Past 1st Base (Carl Tyler of Epilio)		Admin
10:15-11:30	Debugging Notes Java Agents with Eclipse (Bob Balaban of Looseleaf Software)		Dev
11:30 - 12:00	Lunch		Lunch
12:00 - 01:15	Workflow 101: Build a Customizable & Reusable Workflow Engine (Sean Burgess of ASND Designs)		Dev
01:15 - 2:30	Linux Desktop: From OS Install Through Running the Applications (William Malchisky Jr and Joe Litton)		Admin
01:45 - 03:00	XPages: Beyond the Introduction (David Leedy of NotesIn9)		Dev
03:00 - 04:15	IBM Lotus Quickr for Linux (Jerald Mahurin of SNAPPS)		Admin
03:30 - 04:45	Notes/Domino Application Development Competitive Advantage (John Head of PSC and David Via of IBM)		Dev
<hr/>			
Wednesday		February 16 2011	
08:00 - 09:15	Android 101: Introduction to Android in the enterprise (Dennis Heinle)		Admin
08:30 - 09:45	Notes Apps + iPad = iApps (Gayathri Viswanathan)		Dev
09:45 - 11:00	Securing Notes and Domino for the web (John James of WildUnknown)		Admin
10:15-11:30	Super Feats of Integration: XPages w/Symphony, Sharepoint & Office, (John Head & Alex Kassabov of PSC)		Dev
11:30 - 12:45	Lotus on Linux Report: Technical Edition (William Malchisky Jr of Effective Software)		Admin
12:45 - 01:15	Lunch break!		Lunch
01:15 - 2:30	Painlessly Moving Users to a New Certifier (Jess Stratton of Solace Consulting)		Admin
01:45 - 03:00	Enterprise Content Management Integration for Mere Mortals: User & Dev Perspective (Rob Novak of SNAPPS)		Dev
03:00 - 04:15	Let's Do a Health Check (Luis Guirigay of PSC and Kim Greene of Kim Greene Consulting)		Admin
03:30 - 04:45			Dev

Session	Abstract
<b>IBM Lotus Quickr for Linux</b>	In 2010 IBM released the much-anticipated Lotus Quickr for Domino on the Linux platform. In this session Jerald will demonstrate an installation start to finish, remind you of the things you still have to do after the installation, illustrate the slight differences between a Windows and Linux installation, and take your questions. If you've never done a Domino install on Linux, let alone Quickr, this session is sure to open your eyes to how simple (and frugal) it can all be...!
<b>Enterprise Content Management Integration for Mere Mortals: User &amp; Dev Perspective</b>	In 2010, IBM released IBM Lotus Quickr 8.5 for both J2EE and Domino. Along with these releases was a new set of capabilities that impacts not just Quickr users, but users of Notes, Sametime, Windows, Outlook, MS Office, Symphony...you name it. See how integration between either Quickr or the desktop applications (or both!) can bring Enterprise Content Management (IBM Content Manager CM8 or FileNet P8) to your end users in friendly, easy-to-access ways.
<b>Sametime 8.5.1 – Dos, Don'ts and other considerations</b>	New and improved for 2010 and beyond, Lotus Sametime takes a step off the so-called abyss for domino admins – to the Websphere Application Server. Fear not, we will cover some great practices around planning, sizing, directory integration, configurations, WAS admin details, installation considerations and will take a free flow approach to 8.5.1. Come with your questions, concerns and jabs – we will work to get through them all. We will also dip into Sametime NEXT!
<b>Lotus on Linux Report -- Technical Edition</b>	Interested in Linux but are confused with the offerings? Using Domino for Linux, but uncertain how else you can take advantage of similar IBM Lotus offerings? This thoroughly researched review covers as many Lotus on Linux products as I can cover in an hour with deep technical details for each. If that's not enough, we'll even cover usage and install tips plus provide links to free Linux Live discs. These are exciting times in the Lotus space and Linux is a key facet of their software strategy. If you are an admin and are considering Linux in your business--regardless of size--this is the session to attend.
<b>Lotus Apps on a Linux Desktop: From OS Install Through Running the Apps</b>	Attend the ultimate step-by-step installation session demonstrating the configuration of a full desktop Linux O/S running Lotus applications (Notes, Sametime, iNotes, Symphony, et alia) to help you be productive and get to your data. The presented combination works well and the overall process is easier than you thought. If you can read, look at pictures, and use a computer, you have ALL the skills you need! Let two Linux desktop experts show you where to download the O/S, then walk you through every mouse click and keystroke starting at the VERY beginning. We will finish with a functioning and attractive desktop running the Lotus applications you rely on in the real world. To ensure that you can connect to your Lotus servers, we also review VPN, open source thin client access, RDP, VNC, and WiFi: installation, configuration, and usage (defining terms along the way). Leave this session with confidence, knowing well that however you need access to your Lotus data, you can achieve it!
<b>Android 101, Introduction to Android for the Enterprise</b>	Watch a demonstration of how to install the Traveler client, set configuration policies and remotely disable and wipe a device. Have an AT&T android phone that is locked? No problem. I will show you how to side-load apps onto your device, legally. Learn common problems and how to address them before they happen to your users. Android is coming to your organization, and this session will prepare you.
<b>Learning to Run – XPages for Lotus Notes Client Developers</b>	You're an experienced Lotus Notes developer. You've been doing "classic" development for years. You know LotusScript better than your native language. You know @Formula like the back of your hand. But when it comes to Xpages and Javascript, you feel like you're learning to walk all over again. This session will cover some tips and tricks to get you up and running in Xpages. Learn how to translate what you already know, into what you need to know for Xpages. Find out where to get the information you need to be just as skillful at Xpages as you are with Notes client development.
<b>XPages: Beyond the Introduction</b>	You've seen XPages, but how do you best use it? Come to this session to how to integrate the Blueprint CSS FameWork to help speed up your application development. See how to use Custom Controls to control not only your layout but also your content. Find out how to bind to foreign databases and use Repeat Controls to work with your data. Learn some other tricks of the trade to make your applications POP.
<b>Yes You Can! Painlessly Move Your Users To a New Certifier</b>	Learn why you'd want to move users to a new certifier, and the prerequisites you need in place before you start. Finally, understand once and for all the terminology behind a certifier. We will walk step-by-step through meeting those prerequisites, the certifier change process, and what adminp does during the process. Finally, learn what gotchas you need to cautious of while performing the certifier change.
<b>Notes Apps + iPad = iApps</b>	This session focusses on taking Notes Apps to iPad and other similar devices - starting with simple XPage tweaks for better UI, methods of interaction with native apps with Lotus Domino backend. We will take a simple personal journal application for Notes and bring it to iPad exploring the different ways in the process.

Speaker	Bio
	Bob Balaban is a well known speaker and author on technical topics ranging from APIs and application development architectures, to cloud computing and coding techniques for collaboration platforms. Bob is a long-time veteran of Lotus Development Corp., Iris Associates and IBM, and was the original author of the Notes back-end classes for LotusScript and Java. He is currently the President (and Janitor) of Looseleaf Software, Inc., making the lives of customers easier, world-wide. Bob's blog is at <a href="http://www.bobzblog.com">http://www.bobzblog.com</a>
	Kathy Brown is an application developer for an Investment Consulting firm, located in Portsmouth, New Hampshire. Kathy has spoken at Lotusphere and The View's Developer conference. She is co-author of the Lotus Developer Tips Newsletter for LotusUserGroup.org and co-tweeter of @NotesDevTips. In addition to Lotus development, Kathy enjoys running. Kathy blogs about running and Lotus notes at her website <a href="http://www.runningnotes.net">http://www.runningnotes.net</a> .
	Sean Burgess has been part of the Lotus Community for over 15 years. His company, ASND Designs of Laurel, MD, specializes in developing custom solutions for the SMB market. He has released a number of applications on OpenNTF and spoken at past LotusSphere and ILUG conferences. If he's not behind the computer, Sean can be found slaving away in the kitchen. <a href="http://www.asnddesigns.com">http://www.asnddesigns.com</a>
	Jonathan Distad is a Senior Business Consultant at Perficient with more than 10 years of web and application development experience. His recent efforts have supported client-driven efforts to mobilize enterprise workforces through effective collaboration solutions that include mobile application design, governance and security. He writes, blogs and speaks frequently on enterprise collaboration and mobility and is a sought-after subject matter expert in the areas of collaboration and workforce mobilization.
	Kim Greene is the president of Kim Greene Consulting. <a href="http://www.kimgreene.com">http://www.kimgreene.com</a>
	Luis Guirigay is a Senior IT Specialist/Architect focused on Administration, High Availability/ Disaster Recovery, Performance Tuning and High Level Support. He has been working with IBM & Lotus products for more than 12 years and is an IBM Certified Administrator for Domino, Sametime, Lotus Connections, Quickr and WebSphere Portal; and an IBM Certified Developer in Domino and Lotus Workflow. He also has deep experience with WebSphere Application Server, DB2, Tivoli and ILWWCM. Luis has published multiple IBM Redbooks related to Domino, Workplace, DB2 and System i. Luis' speaking engagements include: Midwest Lotus User Group Conference, Chicago Lotus User Group and multiple IBM PoT and IBM Workshops in the Midwest.
	John Head is a Chicago-based consultant and rainmaker. He currently works full-time with PSC Group LLC, where he has served in positions of increasing authority, and currently as Director of Enterprise Collaboration, since 2000. Throughout his career he has focused on the development and implementation of enterprise collaboration solutions. At PSC he served as the architect and team leader for many of the enTouch Frameworks which are PSC-proprietary, ready-to-use business templates. For this, and other work he has been recognized with IBM Lotus and IBM Beacon awards and is a regularly-featured speaker at Lotusphere and other IBM and Microsoft technology conferences and user groups. John focuses on technology solutions that include integration of Notes/Domino with Microsoft technology, Document Generation using OOXML and ODF, Lotus Symphony development, and enterprise social networking. He also has a tendency to twitter about games, music, food, and his love of college (american) football. <a href="http://www.psclistens.com">http://www.psclistens.com</a>
	Dennis Heinle is a Systems Engineer for a large electrical construction company in St Louis. I am responsible for finding, testing and implementing new technologies to make our users more productive, especially our users in the field. I have been administering domino for 11 years in various industries, from the US Air Force to private companies. I have a love for all technology but especially for mobile devices.
	John James, better known as WildUnknown across the interwebs, is as much a secret as his blog and session on Lotus Domino security. You can read his blog at <a href="http://wildunknown.blogspot.com">wildunknown.blogspot.com</a>
	Alex Kassabov is the Vice President of the Collaboration Practice at PSC in Chicago, IL.
	David Leedy is the owner of NotesIn9, a screencast tutorial for XPages and more. He has spoken at numerous events including lamLUG and Lotusphere.
	Short bald geek. Musician in first career, IT for past 25 years. Notes/Domino developer past 15 years. Using linux on home machines past 10 years. Presented Lotusphere sessions on Java in the past, wrote for the old Lotus Advisor magazine, not blogging nearly as often as I should. Living in sunny Tampa, mixing Mai Tais and geeking.
	With More than 17 years experience with advanced collaboration technologies, designing and implementing systems for employers and clients. Speaker, experienced trainer, and support and documentation systems expert. Work with colleagues presenting on collaboration technologies at industry events such as Lotusphere and Collaboration University.
	Bill Malchisky Jr. is Managing Partner and Chief Technical Architect at Effective Software Solutions, LLC (ESS) { <a href="#">Link</a> } in Fairfield, CT. ESS provides Lotus consulting to large enterprises and CTO services to small established firms--particularly regulated verticals and specialty Lotus projects. He has worked with Lotus Notes since 1993 as a developer, administrator, instructor, and architect; is a leading Lotus on Linux partner; and holds multiple Lotus certifications in administration and development. Bill has presented at Lotusphere, VIEW, UKLUG, CIYP, and many domestic LUG events. Bill has co-authored two IBM Redbooks entitled, The Linux Handbook: A Guide to IBM Linux Solutions and Resources, had articles published by LotusUserGroup.org. <a href="http://www.billmal.com">http://www.billmal.com</a>
	President & CEO of SNAPPS, collaboration strategist and architect. Occasionally bloodied by the cutting edge but like it there. <a href="http://www.lotusrockstar.com">http://www.lotusrockstar.com</a> and <a href="http://www.snapps.com">http://www.snapps.com</a>
	Jess Stratton is the principal consultant for Solace Consulting. She has over 10 years experience with Lotus Notes & Domino, specializing in both administration and development. Jess has written technical articles for Lotus magazines, and is a veteran speaker at technology conferences such as The View and Lotusphere. In addition to Notes and Domino, Jess also owns and operates a computer training facility that specializes in end-user education and guest lecturing, whether it's teaching third-graders how the use the Internet, teenagers how to protect themselves online, or technical professionals how to work smarter. In addition, Jess has been a contributing author for several print and web magazines, textbooks, and syndicated columns online. <a href="http://www.momelettes.com">http://www.momelettes.com</a>
	Carl Tyler is the president of Epilio which focuses its attention on working with clients of any size to ensure they are using the right tools and solutions to enable faster decision making through the use of technology and smart thinking.  Epilio offers clients a full range of Unified Communications solutions and services, focused primary on IBM Lotus Sametime and Microsoft Office Communications Server (Lync)
	David Via is a World Wide Executive for Messaging and Collaboration Sales at IBM
	Gayathri "Gaay" Viswanathan has nearly 12 years of experience in software development, definition and improvement of software processes, project management and solutions delivery to a global clientele. Gaay has worked extensively on multiple platforms and technologies including Lotus Notes/Domino, Java, J2EE, Web Services, Linux, C++ and Microsoft suite of technologies. She is the VP of Delivery for Maarga Systems.
